

**APPLICATION SERVER COMPONENT NOTIFICATION TO ONE OR MORE
COMMUNICATION DEVICES OF ONE OR MORE OPEN COMMUNICATION
SESSIONS**

ABSTRACT

5 An application server component of an apparatus in one example receives one or
more notifications of one or more open communication sessions from one or more first
communication devices. The application server component sends one or more of the one
or more notifications of one or more of the one or more open communication sessions to
one or more second communication devices. Upon a request by a communication device
10 of the one or more second communication devices to join an open communication session
of the one or more of the one or more open communication sessions, the application
server component initiates a connection of the communication device to the open
communication session.
